EXPERIENCE

Full Stack Developer

April 2025 - Present

Abyam Technology Pvt. Ltd.

Noida, UP

- * Built and managed **dynamic form systems** to control and update the entire main website content, enabling non-technical teams to modify content efficiently.
- * Developed and implemented a centralized **Lead Management System** used by sales teams to manage, track, and convert leads, improving operational efficiency across the organization.
- * Worked on **multiple website API integrations** and frontend implementation, ensuring seamless data flow and optimized performance across platforms.
- * Designed and developed the **LalPathLabs website UI** and integrated corresponding APIs for real-time data handling and improved user experience.
- * Integrated REST APIs for real-time data synchronization, enabling seamless creation, updating, and retrieval of leads and website content.
- * Implemented advanced filtering and search functionalities to enhance usability and accessibility for internal users and administrators.

Frontend Developer

July 2024 - March 2025

Electrichhive LLP

Jaipur, Rajasthan

- * Developed Admin Console and engineered dedicated dashboards for HR and IT e-commerce operations, enhancing internal workflow efficiency and data visibility.
- * Architected and deployed responsive official websites and blogs for government officials, improving public engagement and digital presence.
- * Implemented responsive design with secure admin panels and user-friendly navigation.
- * Integrated REST APIs for real-time data management and optimized frontend performance.
- * Implemented GitHub workflows to streamline development and deployment processes.

PROJECTS

KiddoTales: Children's Story Generator Web App | *React.js, TailwindCSS, Gemini AI*

[Link](#)

- * Built an interactive story generator using React and Gemini AI to create personalized children's stories with optimized readability for young users.
- * Implemented local storage to preserve stories for future access and enhanced user engagement.

LifeGivers: Blood and Organ Donation Platform | *MERN Stack*

[Link](#)

- * Developed a role-based donation platform supporting donors, patients, hospitals, and blood banks with secure authentication.
- * Designed RESTful APIs to support CRUD operations and real-time data updates.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

JECRC University

Jaipur, Rajasthan

July 2020 - July 2024
